

Cable tester

- Stand alone operation (no PC needed)
- 16 channels
- Auto-programming (learning from a known good sample)
- Test for breaks, shorts or crossings
- Insulation test at 250V DC and 500V DC
- All detected errors are displayed on the LCD together with pin numbers. Bright LEDs and sound signals also show status of the test.
- “Auto test“ function, so operator does not need to press any buttons (after programming) ,just connect the tested cable to the tester and test will begin automatically, until problems detected.

Options possible to add in future:

- Up to 256, 1024 or more channels
- Resistance, diode test
- High voltage AC insulation test
- Cable configurations can be stored inside the tester. (with names and part numbers)
- Test results can be stored on the memory card (together with time, date, operator name, etc.) and easily transferred to the PC.
- An external printer can be attached to print reports, etc.
